# 1 FUNCTIONAL REQUIREMENTS

## 1.1 Analysis Use Case Model

## 1.2 Use Case Glossary and Responsibilities

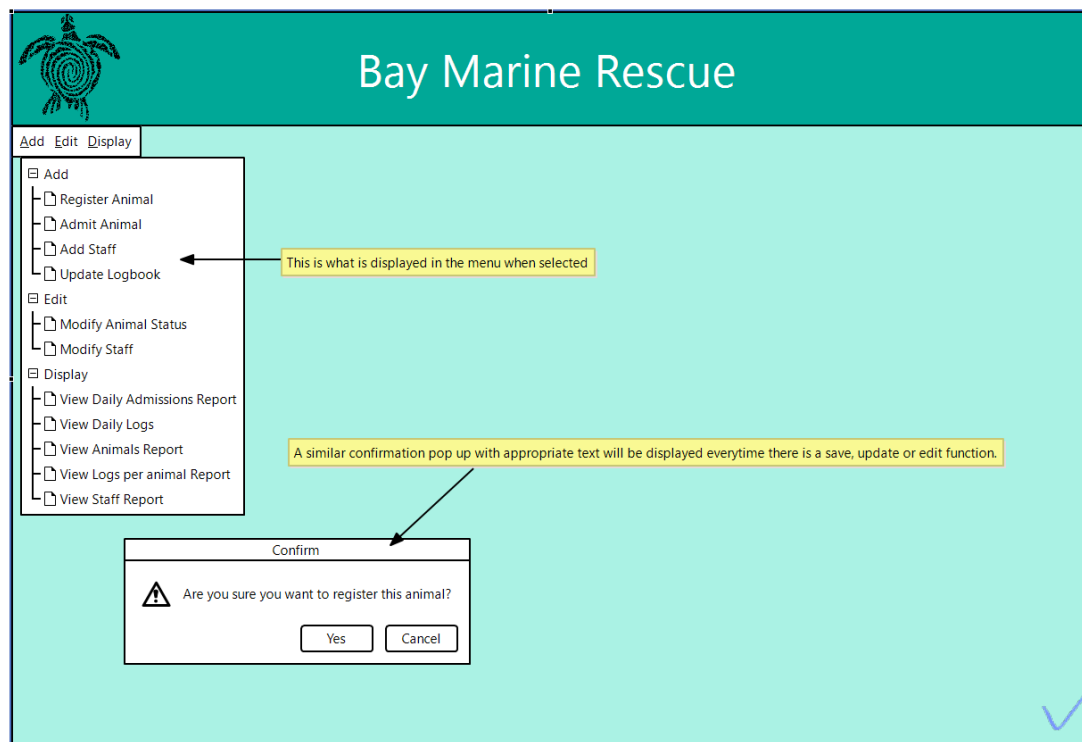

Team Member Responsible: Chloé Clemence	
Use Case Id	Use Case Name
C100	Modify Animal Status
C110	Update Logbook
Queries/Reports	
C120	View Daily Logs
C130	Logs per Animal

Team Member Responsible: Patrick Bamber	
Use Case Id	Use Case Name
A100	Add Staff
A110	Modify Staff
Queries/Reports	
C140	View Animals Report

Team Member Responsible: Chad Conning	
Use Case Id	Use Case Name
B100	Register Animals
B110	Admit Animals
Queries/Reports	
A120	View Staff Reports
B120	View Daily Admissions Report

## 2 UI Prototypes

### 2.1 Team UI Guidelines

This is a template which we will be basing all our forms on. All the forms will include a navigation which will include 3 main headings, namely Add, Edit and Display. The Add field will include the Register Animals, Admit Animal, Add Staff, Update Logbook (Add Log). These will be displayed based on the user level, namely Admin, Admissions or Handler staff. These are mentioned in the use cases. The Edit will be similar in that it has a Modify Animal Status or Modify Staff that also have different user level requirements. The display will contain links to the different Reports, namely, View Daily Admissions, View Daily Logs, View Staff Reports, and View Animal Reports, also with different user levels. The menu buttons are consistently inline on the top left of every screen. The reason for this is for consistency, efficiency and easy navigation. ✓

Every use case is not more than 2 button clicks away and all use cases accessible by specific users are all accessible from the home page and therefore we have no extends in our use case diagram.

Lastly, before saving anything, a confirmation message will be displayed to prevent the user from making errors in modifying the database. With certain use cases, the user will be redirected to another page instead of the home page. There will also be a header on each page, which will be the same regardless of the contents of the page. Each page will also have a separate heading that will display which use case it is connected to. These are for design consistency reasons. ✓

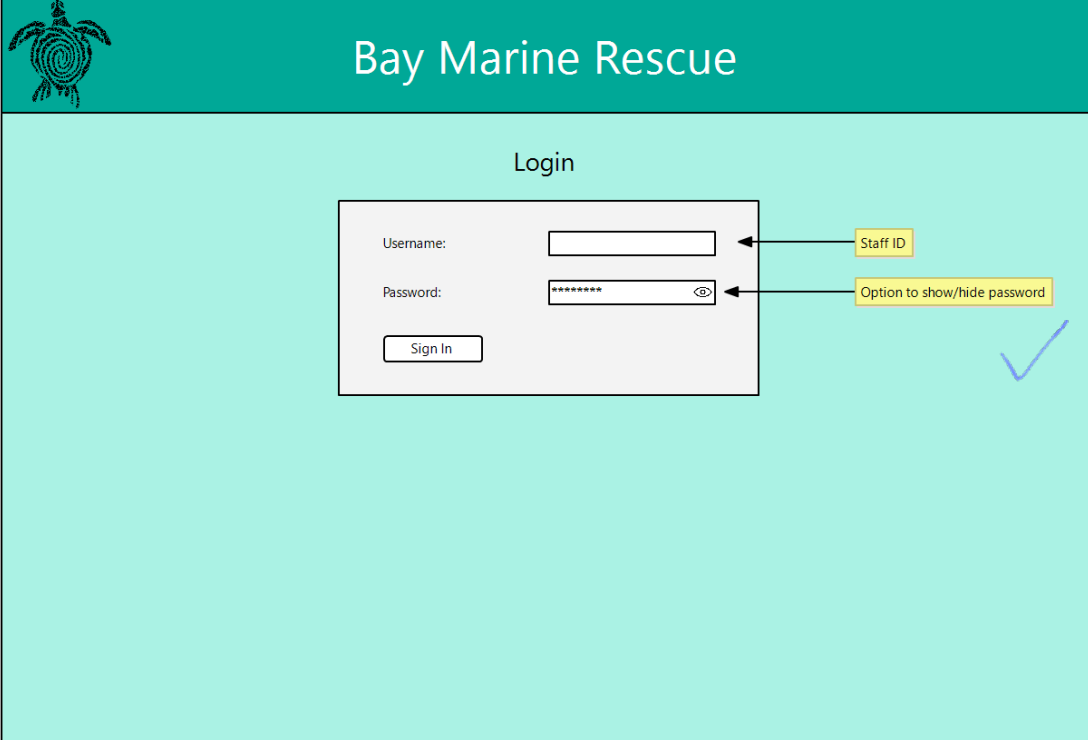

The navigation was changed after realizing that the report options were forgotten on the display, but had already included navigation on all the other pages. The navigation on the template is the correct one and in implementation these will be corrected.

Wherever possible, input controls have been used for input to minimize error. Due to the simplistic nature of the program, the program is intuitive and thus no extensive training is required.

✓ The interface is designed to be minimalist to be as simple as possible to focus on efficiency and reduce clutter. Calibri 15px was chosen as the default font style and font size. A specific colour scheme was also selected where the header has the hash value #00a897 and the background has the hash value #aaf2e4. These design elements are applied for consistency and recognition. The greens are aesthetically complimentary as well as providing one with a sense of the ocean with a marine-like colour.

## 2.2 Team Design for

### 2.2.1 Login / Logout

The login form is titled "Bay Marine Rescue" and "Login". It features a "Username:" field with a label "Staff ID" pointing to it, a "Password:" field with a label "Option to show/hide password" pointing to an eye icon, and a "Sign In" button. A blue checkmark is visible on the right side of the form.

### 2.2.2 Dashboard / Landing Page / Main Page

#### 2.2.2.1 Admin Landing Page

The admin landing page is titled "Bay Marine Rescue" and "Welcome to Bay Marine Rescue". It displays a grid of buttons for various administrative tasks, each with an icon and a label:

- Add Staff (Fish icon)
- Modify Staff (Turtle icon)
- View Staff Reports (Penguins icon)
- Register Animal (Whale icon)
- Admit Animal (Dolphin icon)
- View Daily Admissions (Whale icon)
- Modify Animal Status (Fish icon)
- Update Logbook (Turtle icon)
- View Daily Logs (Penguins icon)
- View Logs Per Animal (Whale icon)
- View Animals Report (Dolphin icon)

A blue checkmark is visible on the right side of the page.

### 2.2.2.2 Admission Staff Landing Page

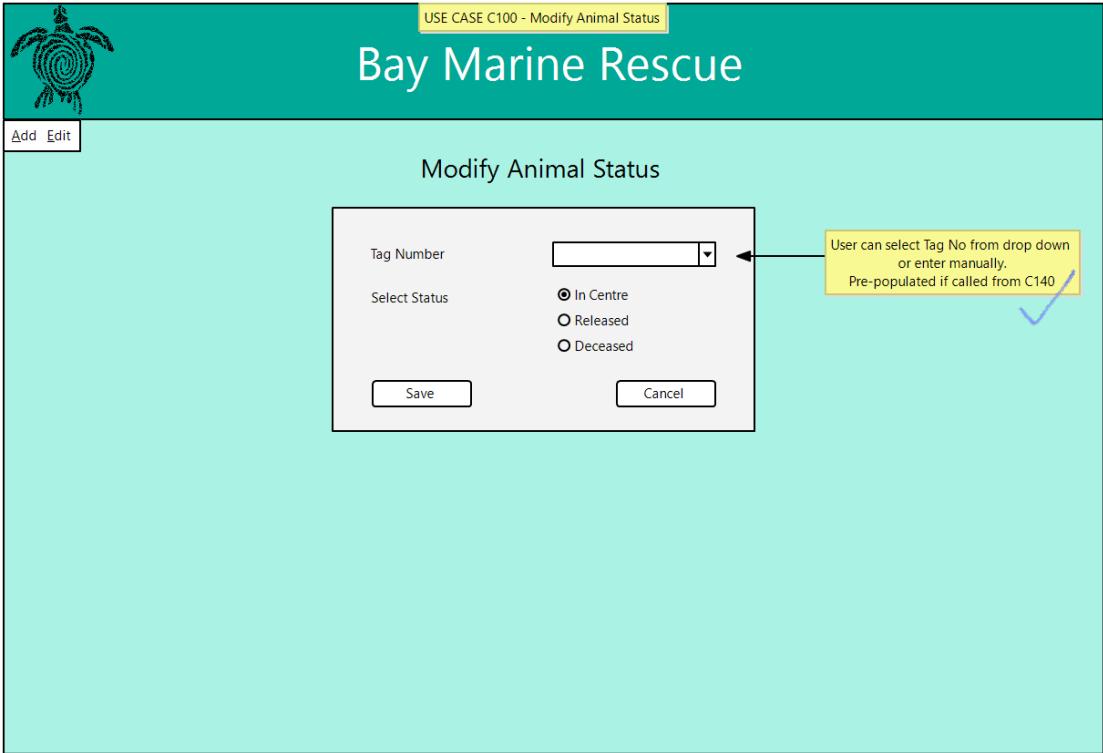

### 2.2.2.3 Handler Staff Landing Page

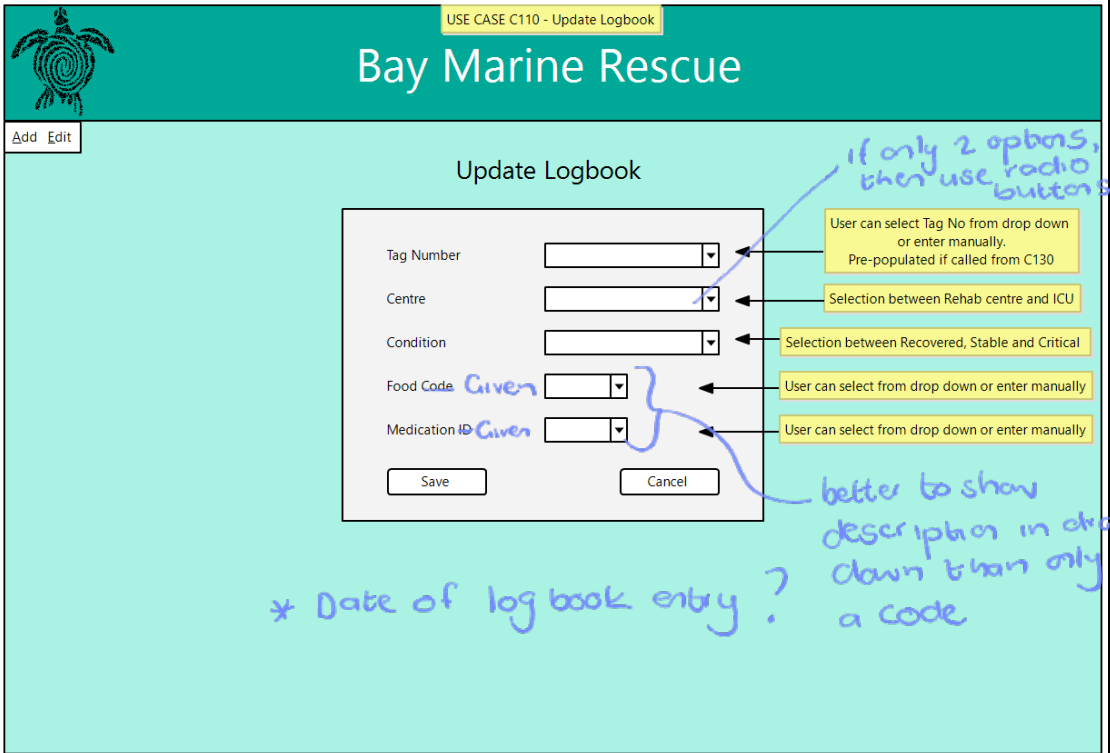

## 2.3 UI Designs & Updated Analysis Use Case Narratives

### 2.3.1 Designed by Chloé Clemence

Use Case ID	Use Case Name
C100	Modify Animal Status
Primary Business Actors	Other participating Actors
Handler Staff	Administrator Staff Admission Staff
Description	This allows the staff member to modify the animal status.
Pre-Conditions	The user must be logged in. The animal is registered.
Triggers	The user selects the modify animal status option or is called from C140.
Post-Conditions	The animal status is modified.
Basic Flow of Events	<ol style="list-style-type: none"> <li>1. The modify animal status form is displayed.</li> <li>2. The user selects or enters a tag number.</li> <li>3. The user selects the option and clicks save.</li> <li>4. The system returns to its home page.</li> </ol>
Alternate Flow of Events	<ol style="list-style-type: none"> <li>3. The user clicks cancel.</li> <li>4. The system returns to its home page.</li> </ol>
Initial UI design	

Use Case ID	Use Case Name	
C110	Update Logbook	
Primary Business Actors		Other participating Actors
Handler Staff		Administrator Staff
Description	This allows the user to add a log, to update the logbook.	
Pre-Conditions	The user must be logged in. The animal is registered. The animal is in the centre.	
Triggers	The user selects the Update Logbook option or is called from Use Case C120 or C130.	
Post-Conditions	A new log is added to the logbook or a selected log is updated.	
Basic Flow of Events	<ol style="list-style-type: none"> <li>1. The update logbook form is displayed.</li> <li>2. The user selects the desired Tag No</li> <li>3. The user inputs the relevant data.</li> <li>4. The user clicks save button.</li> <li>5. The system returns to its home page.</li> </ol>	
Alternate Flow of Events	<ol style="list-style-type: none"> <li>4. The user clicks the cancel button.</li> <li>5. The system returns to its home page.</li> </ol>	
Initial UI design	 <p>USE CASE C110 - Update Logbook</p> <p>Bay Marine Rescue</p> <p>Add Edit</p> <p>Update Logbook</p> <p>Tag Number</p> <p>Centre</p> <p>Condition</p> <p>Food Code</p> <p>Medication ID</p> <p>Save</p> <p>Cancel</p> <p>if only 2 options, then use radio buttons.</p> <p>User can select Tag No from drop down or enter manually. Pre-populated if called from C130</p> <p>Selection between Rehab centre and ICU</p> <p>Selection between Recovered, Stable and Critical</p> <p>User can select from drop down or enter manually</p> <p>User can select from drop down or enter manually</p> <p>better to show description in drop down than only a code</p> <p>* Date of log book entry ?</p>	

Use Case ID	Use Case Name
C120	View Daily Logs
Primary Business Actors	Other participating Actors
Handler Staff	Administrator Staff
Description	This displays the logs for the selected date to be viewed.
Pre-Conditions	The user must be logged in.
Triggers	The user selects the View Daily Logs option.
Post-Conditions	The report for the logs for selected date is displayed.
Basic Flow of Events	<ol style="list-style-type: none"> <li>1. The View Daily Logs form is displayed, displaying the day's logs.</li> <li>2. The user clicks the close button.</li> <li>3. The system returns to its home page.</li> </ol>
Alternative Flow of Events	<ol style="list-style-type: none"> <li>2. The user selects logs on a specific animal.</li> <li>3. Calls C130.</li> <li>4. The user clicks close.</li> <li>5. The system returns to its home page.</li> </ol>
Alternative Flow of Events	<ol style="list-style-type: none"> <li>2. The user selects to add a new log.</li> <li>3. Calls C100.</li> <li>4. The user clicks close.</li> <li>5. The system returns to its home page.</li> </ol>
Alternative Flow of Events	<ol style="list-style-type: none"> <li>2. The user selects export to export data to an excel sheet.</li> <li>3. File is saved to default location.</li> <li>4. The user clicks close.</li> <li>5. The system returns to its home page.</li> </ol>

Tag No	Centre	Condition	Food Code	Med ID	Action
123	Rehab	stable	F7	S21	Logs

Add Edit
 USE CASE C120 - View Daily Logs

## Bay Marine Rescue

### Daily Log Report

Date

Populates with current date. The user can change

Calls use case C130

better to show a description than a code.

New Log
 Export
Close

Calls use case C110
 Displays logs from the date selected by the user
Exports as excel file

Use Case ID	Use Case Name
C130	View Logs per Animal
Primary Business Actors	Other participating Actors
Handler Staff	Administrator Staff
Description	This displays a report of the logs for the selected animal.
Pre-Conditions	The user must be logged in. Selected animal must exist.
Triggers	The user selects the Logs per animal option or called from C120.
Post-Conditions	The report for the logs for selected animal is displayed.
Basic Flow of Events	<ol style="list-style-type: none"> <li>1. The logs for the animal are displayed.</li> <li>2. The user selects the close option.</li> <li>3. The system returns to its home page.</li> </ol>
Alternate Flow of Events	<ol style="list-style-type: none"> <li>2. The user selects new log.</li> <li>3. Calls C110.</li> <li>4. The user clicks close.</li> <li>5. The system returns to its home page.</li> </ol>
Alternative Flow of Events	<ol style="list-style-type: none"> <li>2. The user selects export to export data to an excel sheet.</li> <li>3. File is saved to default location.</li> <li>4. The user clicks close.</li> <li>5. The system returns to its home page.</li> </ol>
Alternative Flow of Events	<ol style="list-style-type: none"> <li>2. The user searches for an animal.</li> <li>3. That's animal's logs are displayed.</li> <li>4. The user clicks close.</li> <li>5. The system returns to its home page.</li> </ol>

Initial UI design

**USE CASE C130 - View Logs per Animal**

**Bay Marine Rescue**

Add Edit

The user can search on Tag No or name

Animal Logs

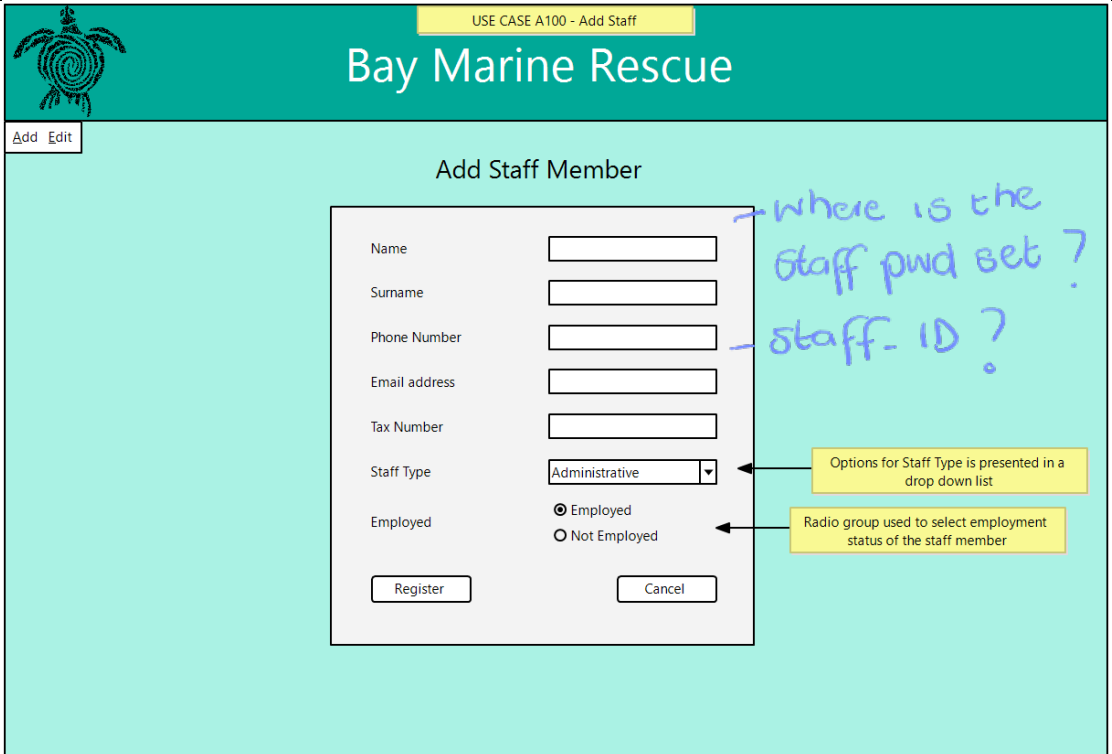

do not use code, rather show description

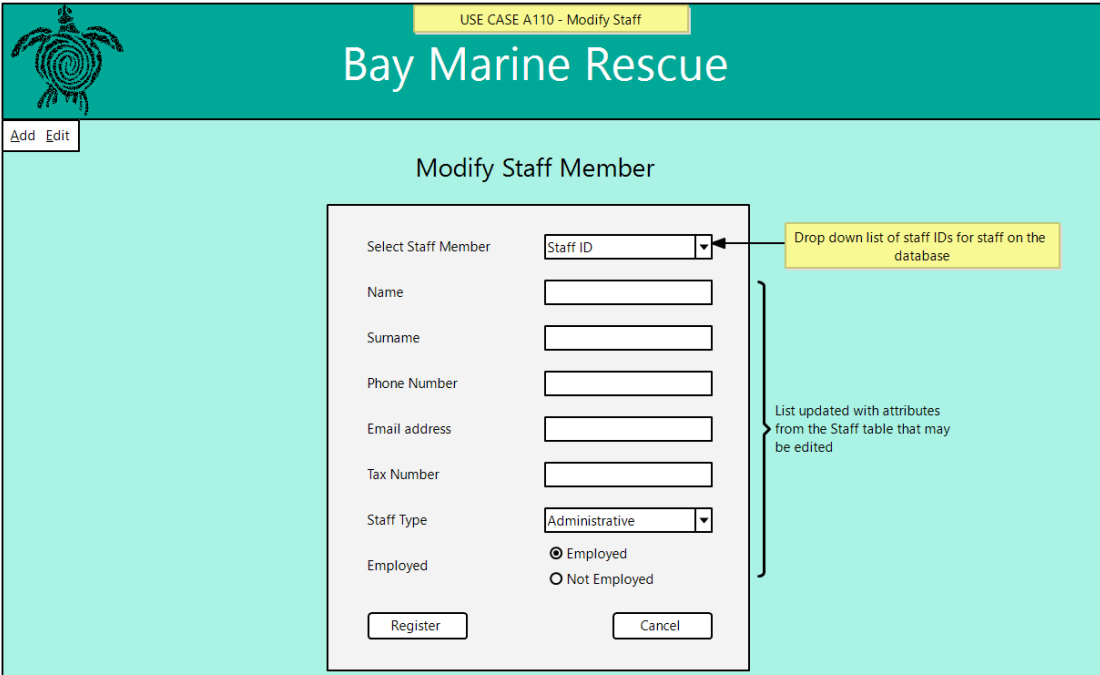

Tag No	Date	Centre	Condition	Food Code	Med ID
123	30/06/2021	Rehab	stable	F7	S21

New Log      Export      Close

Calls use case C110      Displays logs relating to a specific animal      Exports as excel file

### 2.3.2 Designed by Patrick Bamber

Use Case ID	Use Case Name
A100	Add Staff
Primary Business Actors	Other participating Actors
Administrative staff	None
Description	This allows the administrator to add a staff member onto the system.
Pre-Conditions	The user must be logged on. The staff member to be added must not exist on the system.
Triggers	The user selects the add staff member option.
Post-Conditions	The system is populated with a new staff member or called from A120.
Basic Flow of Events	<ol style="list-style-type: none"> <li>1. The system displays the new staff member screen with various options that should be included when creating a new staff member such as staff name and phone number</li> <li>2. The form is filled out and the administrator saves the changes and a new staff member is created</li> <li>3. An automatic email is sent to the staff member containing the staff id and password</li> <li>4. The system returns to its home page</li> </ol>
Alternative flow of events	<ol style="list-style-type: none"> <li>2. The user clicks cancel</li> <li>3. The system returns to its home page</li> </ol>
Initial design UI	

Use Case ID	Use Case Name
A110	Modify Staff
Primary Business Actors	Other participating Actors
Administrative staff	None
Description	This allows the administrator to modify staff members that currently exist on the system.
Pre-Conditions	The user must be logged on. The staff member to be modified must exist on the system.
Triggers	The user selects the modify staff member option.
Post-Conditions	The system is updated with the modified fields of the existing staff member or called from A120.
Basic Flow of Events	<ol style="list-style-type: none"> <li>1. The system displays the modify staff screen where the administrator can update the necessary information of a particular staff member such as changing access levels or changing staff member information</li> <li>2. The administrator selects the relevant staff member from the drop-down menu by Staff ID</li> <li>3. When the steps are complete the staff member will be modified</li> <li>4. The system returns to its home page</li> </ol>
Alternative flow of events	<ol style="list-style-type: none"> <li>3. The user clicks cancel</li> <li>4. The system returns to its home page</li> </ol>
Initial design UI	 <p>also provide option to find a staff member by entering surname</p>

### 2.3.3 Designed by Chad Conning

Use Case ID	Use Case Name
B100	Register Animal
Primary Business Actors	Other participating Actors
Admission Staff	Administrator
Description	This allows an admission staff member to register an animal on the system.
Pre-Conditions	The user must be logged on. A new animal must have arrived at the enclosure or must've been born in the enclosure.
Triggers	The user selects the register an animal option.
Post-Conditions	The new animal should be registered.
Basic Flow of Events	<ol style="list-style-type: none"> <li>1. A window to enter the new animal's details is displayed.</li> <li>2. The user enters the relevant data of the animal being registered.</li> <li>3. The system validates the inputs.</li> <li>4. The user clicks on Register. ✓</li> <li>5. Calls B110 to Admit animal. ✓</li> <li>6. The system returns to its home page.</li> </ol>
Alternative Flow of Events	<ol style="list-style-type: none"> <li>4. The user clicks on Cancel.</li> <li>5. The system returns to its home page.</li> </ol>
Initial UI design	

Use Case ID	Use Case Name
B110	Admit Animal
Primary Business Actors	Other participating Actors
Admission Staff	Administrator
Description	This allows the user to record the admission details of an animal.
Pre-Conditions	The user must be logged on. The animal must be registered.
Triggers	The user selects the admit an animal option.
Post-Conditions	The new animal's admission details should be recorded.
Basic Flow of Events	<ol style="list-style-type: none"> <li>1. A window to enter the new animal's admission details is displayed.</li> <li>2. The user enters the relevant data of the animal being admitted.</li> <li>3. The system validates the inputs.</li> <li>4. The user clicks on Admit.</li> <li>5. The system returns to its home page.</li> </ol>
Alternative Flow of Events	<ol style="list-style-type: none"> <li>4. The user clicks on Cancel.</li> <li>5. The system returns to its home page.</li> </ol>
Initial design UI	

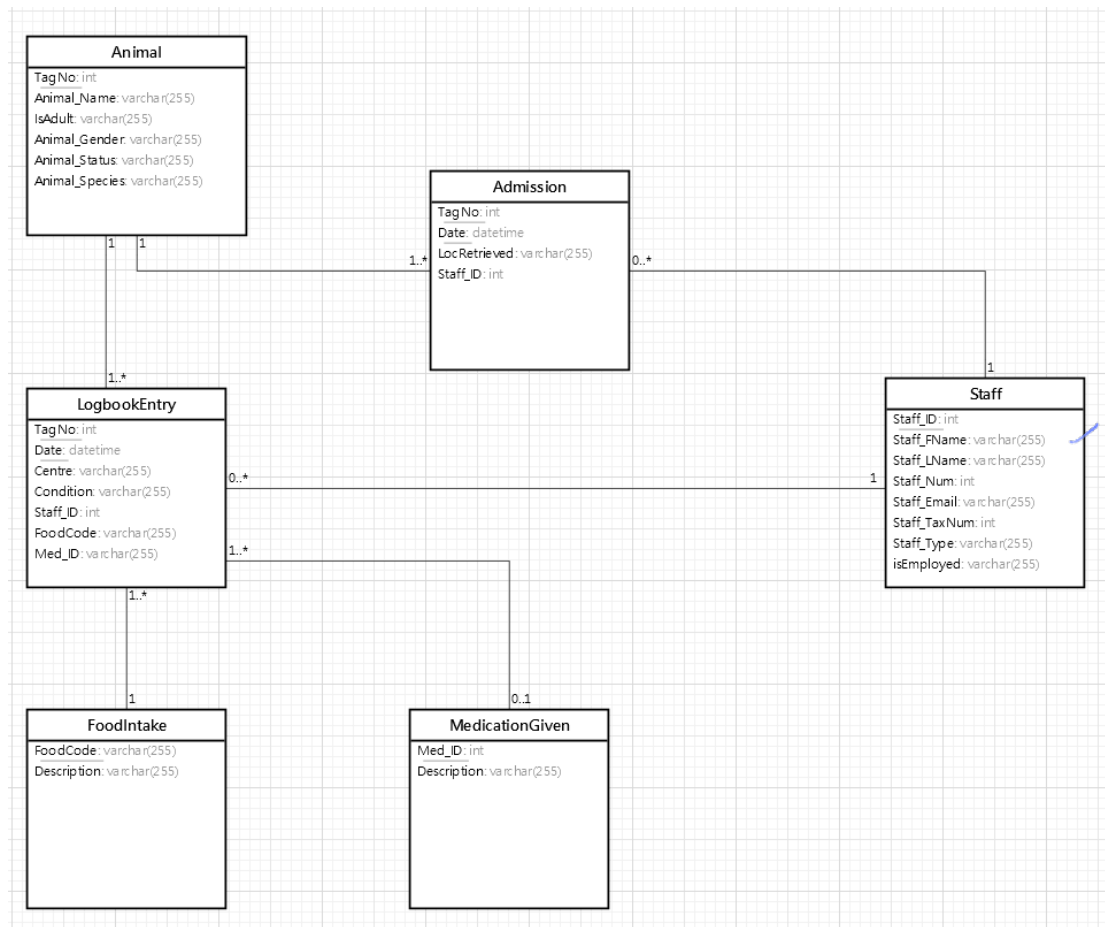

Use Case ID	Use Case Name
A120	View Staff Reports
<b>Primary Business Actors</b>	<b>Other participating Actors</b>
Administrator	None
<b>Description</b>	This allows the user to view information of staff members.
<b>Pre-Conditions</b>	The user must be logged on.
<b>Triggers</b>	The user selects the view staff reports option.
<b>Post-Conditions</b>	The staff reports should be displayed.
<b>Basic Flow of Events</b>	<ol style="list-style-type: none"> <li>1. A report with all staff information is displayed.</li> <li>2. The user clicks close.</li> <li>3. The system returns to its home page.</li> </ol>
